Bruno Bottazzini

Software Architect & Technical Lead | AI-Augmented Cloud-Native Systems | Java & Kubernetes (CKA)
Turin, Piedmont, Italy

Summary

Software Architect and Technical Lead with 10+ years of experience in designing
and building scalable, cloud-native systems.

I currently work on end-to-end software architecture, translating business
requirements into technical solutions and guiding development teams through
complex projects, from design to production.

My background includes:
• Java and JVM-based ecosystems
• Cloud-native architectures and Kubernetes (CKA)
• Backend and distributed systems
• Technical leadership and architecture decision-making

I enjoy working on complex domains, improving system reliability and maintainability,
and mentoring engineers while maintaining a hands-on approach.

Experience

Tinexta Infocert

Software Architect / Technical Lead
February 2023 - Present (3 years 10 months)
Milano, Lombardia, Italia

Software Architect and Technical Lead responsible for the design and evolution of cloud-native, enterprise-grade platforms, with a strong focus on AI-augmented engineering practices.

I design end-to-end architectures translating functional and non-functional requirements into scalable, secure, and maintainable solutions, while

integrating AI-driven workflows to enhance productivity, architectural validation, and software quality.

Key responsibilities and impact:

• Defined architecture and technical guidelines for complex cloud-native systems
• Led architectural decisions on Java-based distributed platforms and Kubernetes environments
• Designed and governed AI-augmented development workflows (LLM-assisted coding, architectural scenario simulation, automated review and systemic testing)
• Integrated AI as a decision-support layer in architectural trade-off analysis
• Coordinated a high-performance senior team leveraging AI to reduce delivery time and increase quality density
• Mentored engineers on AI-assisted engineering practices and architectural thinking
• Collaborated with business stakeholders to align AI-enabled technical strategy with organizational goals
• Actively contributed hands-on to system design, critical problem solving, and platform evolution

Eco-Mind Ingegneria Informatica
Senior Full-stack Developer
May 2019 - January 2023 (3 years 9 months)
Torino, Piemonte, Italia

Senior Full-stack Developer working on complex, high-impact software projects
across different domains.

Focused on backend development and system design while contributing across
the full stack, from APIs to frontend components.

Key responsibilities and contributions:
• Designed and developed backend services using Java and Kotlin
• Contributed to architectural decisions and technical design discussions
• Worked on complex business logic and system integrations
• Collaborated closely with stakeholders to translate requirements into solutions

• Supported junior developers through code reviews and technical guidance

Targa Telematics SpA
Software Engineer
September 2016 - April 2019 (2 years 8 months)
Treviso, Veneto, Italia

Software Engineer working on IoT and fleet management platforms in a distributed systems environment.

Mainly focused on backend development for data-intensive and integration-heavy systems.

Key responsibilities and contributions:
• Developed backend services using Java and Spring Framework
• Worked on IoT-related systems and data processing pipelines
• Contributed to the evolution of existing platforms and services
• Collaborated within cross-functional teams on system integrations

Intel Corporation
Software Engineer
September 2014 - August 2016 (2 years)
Campinas Area, Brazil

Software Engineer working in an international, enterprise-scale R&D environment.

Contributed to software development across multiple technologies, with a focus on quality, performance, and innovation.

Key responsibilities and contributions:
• Developed software in Java and C, including Android components
• Worked on web applications using JavaScript, Node.js, AngularJS, and jQuery
• Collaborated with international teams in a large corporate environment
• Contributed to open-source initiatives and internal frameworks

E9 Tecnologia e Inovações
Software Engineer
November 2013 - August 2014 (10 months)
Campinas Area, Brazil

Software Engineer involved in the development of enterprise ERP solutions.

Worked on both backend and frontend components within a Java-based ecosystem.

Key responsibilities and contributions:
• Developed ERP systems using Java, JSF, and PrimeFaces
• Worked with relational databases and PL/SQL
• Built reporting solutions using JasperReports
• Contributed to full-stack development across the application

Ícaro Technologies
Software Engineer
July 2011 - October 2013 (2 years 4 months)
Campinas Area, Brazil

Software Engineer working on enterprise solutions within a Java-based ecosystem.

Contributed to the development of backend and frontend components, gaining solid
experience in enterprise application development and relational databases.

Key responsibilities and contributions:
• Developed systems using Java, Javascript
• Worked on business logic and data access layers
• Used PL/SQL and relational databases
• Built reporting solutions using JasperReports
• Contributed to full-stack development across the application

CTI Renato Archer_MCTI
Software Engineer (R&D)
August 2010 - June 2011 (11 months)
Greater Campinas

Software Engineer working in a research and development environment, focused on innovative and experimental software solutions.

Collaborated on complex projects involving system-level development, web technologies, and open-source initiatives.

Key responsibilities and contributions:
• Developed software in Java and C

• Worked on Android development and embedded-related components
• Developed web applications using JavaScript, Node.js, AngularJS, and jQuery
• Contributed to open-source projects and research-driven initiatives
• Collaborated with multidisciplinary and research-oriented teams

Education

Centro Universitário UniMetrocamp

Master's degree, Computer Engineering, Computer Engineering, Computer Engineering · (2008 - 2012)

Ministero della Giustizia Italiana

Laurea Magistrale LM in Ingegneria Informatica · (January 2008 - December 2012)
